

# **Frequently Asked Questions about Plasterite**

## **What is plasterite ?**

*Plasterite is a healing device made from cheap and natural ingredients in order to create an abundance of Life Force Energy (AKA Chi, Prana Positive Orgone Energy etc.)*

*It is versatile indeed and can be used for many positive purposes. Mainly, nowadays, it is an efficient method to employ against Geo-Engineering (AKA Chemtrails, which are fairly ubiquitous around the world!) Plasterite devices help make the skies blue again, clean, and gives back beautiful natural clouds, etc. to your neighbourhood.*

*Plasterite uses only natural, safe and non-toxic ingredients and is therefore more in harmony with nature. The results are greater when using this method particular in contrast to the artificial resin/metal organite protocol. (Which is still in itself very powerful and useful)*

## **What is in Plasterite?**

- *Water (can be 'charged' by adding in crystals beforehand)*
- *Himalayan Rock Salt & or Sea Salt (The salt kick-starts the whole energy exchange process, interacting with the plaster of Paris / Selenite)*
- *Plaster of Paris (essentially powdered gypsum, identical to selenite)*
- *(beach) Sand with minerals, or fine sand bought in a shop is also good*
- *(optional) Crystals (ideally cleansed in water 1<sup>st</sup> or otherwise 'charged')*

## **How do I make my own Plasterite?**

*Mix the ingredients in a container or bucket for larger amounts, first water, than salt, than plaster, than lastly sand. Use a whisk ideally to make sure the ingredients are nicely 'whipped up.'*

*The consistency should be somewhat like cream once ready to use, not too thick and not too runny. You now simply pour the mix it into a mold and perhaps put a crystal in the centre, ideally with an intention in mid of what you wish to accomplish through the power of positive intention. That's it. Incredibly simple and rewarding on a scale it is hard to relay!*

*Ask nature improve the good energy level in your surroundings. If you use a mold you can put some oil in it first so it gets out more easily later on. This is usually necessary with silicon molds.*

*Instead of a real crystal you can use cheap crystal powders, which works great, or you can put crystals in the water first and then just use the 'charged' water, similar to homeopathic medicine in some ways. Essentially the water will have a similar effect as if the crystals themselves were added into the mix. The benefit being, you can keep the crystals and reuse them indefinitely. This seems to work just as well. Some other ingredients are beneficial but not essential like seashells, pine cones, seaweed, zeolite, etc. etc.*

### **What does it cost ?**

*Almost nothing. Even very large devices are not expensive to make.*

### **What rewards can I expect from making my own Plasterite ?**

*Removing chemtrails, helping nice natural weather return, etc. but it also positively affects people, animals, plants, indeed any lifeforms in a positive manner. Things will change. You have to try it for yourself to understand. You can't learn it all out of a book, you must experience it.*

### **How to protect Plasterite?**

*You can paint them, use shellac, etc, be creative. You can also pour the mix into other containers such as empty bottles, jars, anything you can close to keep the elements out. (the energy still goes far and wide)*

### **Why have most people never heard of it ?**

*There is no money involved with the production of Plasterite which is the main reason it is still not widely known about. None the less word is now spreading and people are having huge successes by getting involved.*

### **How long has plasterite been around ?**

*A long time, however the knowledge was rediscovered several years ago by open minded individuals who wanted to test it out, to see how it works. Orgonite plus.net is now no longer available but the documentation/ development process / documentation has been saved.*

### **Is Plasterite just as strong as a an Orgonite Chembuster ?**

*Yes and in fact they appear to be even stronger since they give off a higher vibrational healing frequency, typically promoting the healing of the three higher chakras. Orgonite chembusters do have their advantages though and ideally both should be used where possible.*

### **What is a Blue Sky Broadcaster (BSB) ?**

*A method consisting of wrapping a long electric extension cord around a tool of light, ideally a fairly large piece of plasterite, but it can also work with metal resin orgonite, and put an electric device, for example a lamp on one end of the extension cord which wraps around and around the healing device and connect the other side to the grid via the plug. Wrapping the whole thing with tape keeps it together nicely and looks quite nice using silver tape. This is a very powerful method since it appears to send the healing energy to the whole electricity grid locally.*

### **I have been told this is all a hoax/scam ?**

*People are naturally skeptical, but with Plasterite the proof is in the pudding. You will almost certainly feel a HUGE effect of uplifting energy*

*from making plasterite, especially if you are sensitive to energies. It can even be a little overwhelming at times since it is so powerful. Some people who make money from making conventional organite believe this is false information setting out to detract from organite, i.e. counter-intelligence, but this is 100% untrue.*

*Organite has it's benefits e.g. more durability and is still a wonderful and necessary tool. However it is FAR more expensive to make and requires expertise, face masks and can be potentially dangerous before the devices are cured. Plasterite making is so safe children can join in!*

### **What is Plasterite 'Gifting' ?**

*Making energy devices, tools of light, protecting the environment against chemtrailing and EMR and putting them all over the place, especially hidden or buried next to mobile phone masts (find them locally using in the UK using <http://www.sitefinder.ofcom.org.uk>) – Google cellphone mast locator to find out if your country has an equivalent service. You can google images of cellphone masts in order to easily recognize them, including the fake trees and cacti etc. that have started springing up.*

*It is also great to give them to people you know, friends, family or even strangers. Many will feel the energy when the devices are held and can use them when they feel an uplift in their spirits is needed.*

*It is also great to advise people to place them next to their wi-fi units since the energy will be broadcast for tens of meters in every direction helping uplift their whole home! (Whilst helping the atmosphere locally) all from a device costing literally pennies!*

### **Can I use Metals in Plasterite ?**

*No, better not, it's not necessary. It can also cause a slightly unattractive rusting effect since water is used in the creation of plasterite.*

## **Can I use other natural ingredients like healing essential oils ?**

*Yes, this is a great addition which adds to the effect and smells great!*

## **.....The future of plasterite ?**

*In the hands of the individual, i.e. you! The more people who join in and start making their own Plasterite the better it is for us all collectively.*

## **Recipes, Ideal Ingredient Ratios & Formulas**

*The most basic recipe Ingredients;*

- WATER 850 ml
- PLASTER 1000 ml
- SALT 2 large table spoons
- SAND about 25 % of total mix

*More advanced recipes may include the following added to the mix;*

- Crystals, Crystal Gravel etc.
- Semi Precious Gems
- Sea Shells, Pine Cones
- Sea Weed
- Zeolite
- Coccolites, and other natural ingredient that enhance especially those from the Sea/Ocean. Anything natural with the Phi ratio will help enhance results.

*For a very large device, such as one made in a traffic cone mold;*

*2 gallons of dry plaster  
1.5 gallons of water  
2.5 cups of sand*

*Half a cup of sea salt mixed with the water  
Always add the plaster to the water.*

*You are best to get help with this since it is VERY HEAVY, however this is what you need to pour a large traffic cone.*

*The plaster, as you mix it, will often look very liquid, don't be fooled however, it will start hardening quickly even in your mix bucket, so get everything prepared in advance before you start mixing. As soon as you pour your plaster in your mold you must be ready to add whatever you want to add, crystals, various stones, herbs etc...*

*We collectively need to raise the vibration of our Mother Earth urgently.  
The power of using Plasterite is incredible, and results are profound.*

*You will positive changes in the Sky locally and feel blissful.*

*Bless you should you decide to get involved!*

*Happy stirring / pouring! ☺*
